H WINKELEISEN

I SCHRAUBEN

Allgemeiner Hinweis:

Für weitere Informationen, z.B. zur Statik und maximalen Windgeschwindigkeit, beachten Sie bitte die Angaben auf www.upmprofi.de

Pfostenabstand/Länge der Füllelemente $b_{\max.} = 1930 \text{ mm}$

$a = b + 30 \text{ mm}$

Pfostenträger zum Aufdübeln

ALTERNATIVE: Einbetonierung der Pfosten*:

- A Auf lotrechte Ausrichtung achten
- B Erstellen Sie zur Fixierung der Pfosten z.B. aus Holzlatten eine Hilfskonstruktion, um ein Verrutschen beim Einfüllen des Betons zu vermeiden

* (70x70x2400mm Pfosten auf Bestellung erhältlich)
